Investment Information from investment's prospectus
Investment Objective & Strategy
The investment seeks capital appreciation. The fund is designed to provide diversification within the international asset class by investing the majority of its assets in other mutual funds advised by the adviser, referred to as underlying funds. The

Past name: MFS International Diversification R4.

Broad Asset Class: Foreign Large Blend

Notes
This material is authorized for client use only when preceded or accompanied by a Disclosure Statement, a current plan performance summary, and a fund prospectus and/or informational brochure containing more complete information. These can be obtained from your investment professional or your plan's website and should be read carefully before investing or sending money.

Morningstar ratings reflect the reduction of the fund's expense ratio. However, your plan may charge an administrative fee and/or plan-level fee, which is not reflected in this rating.

To determine a fund's star rating for a given period, the fund's Morningstar risk score is subtracted from its Morningstar return score. If the fund scores in the top 10% of its respective Morningstar category, it receives five stars; if it falls in the next 22.5%, it receives four stars; a place in the middle 35% earns it three stars; those in the next 22.5% receive two stars; and the bottom 10% get one star.

The Broad Asset Class identifies a fund's investment style. The Broad Asset Class was developed by Nationwide in conjunction with Ibbotson Associates for asset allocation. Asset Allocation does not assure a profit or guarantee against loss in a declining market.
